

Enoxaparin Sodium Injection – Sandoz

Sandoz Inc. (“Sandoz”) is initiating a recall of one lot (SAB06761A, Exp 04/2023) of Enoxaparin Sodium Injection, USP 40 mg/0.4 mL Single-Dose Syringes to the consumer level. A portion of lot SAB06761A experienced a temperature excursion during shipment. Enoxaparin Sodium for Injection Lot SAB06761A was shipped to customers in the months of September and October 2021.

The exposure to higher temperatures may have significantly impacted the recalled product’s (lot SAB06761A) effectiveness and thus there may be reasonable probability of risk for patients with health conditions that the product is intended to treat. Such patients could be at risk for blood clots blocking blood vessels, an artery, or traveling to other tissues or organs causing pain, swelling, stroke, clots to the lung or death as a result of the underlying condition.

Consumers should contact their physician or healthcare provider if they have experienced any problems that may be related to taking or using this product.
