

# COPD Telemonitoring Program

## About the Program

If you are a PrimeTime Health Plan member and have been diagnosed with COPD, PrimeTime Health Plan's COPD telemonitoring program is available to you at no additional cost.

By participating in this program, telemonitoring equipment will be used to report your Oxygen Saturation values and send your results to your assigned nurse. The nurse will monitor your results to watch for trends or potential complications from COPD.

Throughout this program your results are monitored and specific trends can be identified. The data can be shared with your physicians as needed or on your appointment days for records of your data. Educational materials are also available to help you understand all aspects of your condition.

## Professional Support

In this program, you are assigned a registered nurse who will closely monitor your COPD through use of your equipment. Your nurse will provide support and answer questions you have regarding your condition.

## At Home Monitoring

You can use equipment to monitor your COPD from the comfort of your home.

## Educational Materials and Resources

We have educational materials and resources available to provide you with the information you need for quality care.

## Learn More

If you are interested in this program, please contact us and ask to speak with a nurse about our COPD program.
